## Growing your garden vision - Love your outdoor space

By Compass Garden & Landscape Design

Compass Garden & Landscape Design is a small garden design company based in Bradford-on-Avon. Designer Tom Murphy has undertaken projects in Wiltshire, Bath, Bristol, Hampshire and London, covering a wide range of styles and varying sizes of garden. A number of recent projects have been in new-build properties, where Tom has used his vision and creativity to transform a square of grass into an inspirational space. Current and past projects also include period gardens, in some cases following a traditional design and planting scheme, and in others bringing together old and new with a contemporary style that still respects the history of the area.

Whether you need help starting from scratch with your garden, or you wish to reconfigure an existing plot, choosing a professional garden designer like Tom is crucial in helping you to achieve the garden of your dreams. At Compass we listen

carefully to your requirements and ideas before providing a vision of how best to use the space, including materials and planting, within your budget. A garden is an extension of a home and is too often neglected. With our creativity and passion we can help your garden, and as a result your home, to achieve its full potential.

Tom Murphy trained at the exclusive Garden Design School in Bristol

before starting the company in 2016. Previously a Chemistry teacher and Head of Science, he has a passion for making a difference, listening to and understanding the needs of those he works with. This is reflected in his work and the testimonials of his clients.

Get in touch with Tom at Compass to arrange a free consultation and discussion of the design and build process.
